TUESDAY......AUGUST 14, 1877

MORE ABOUT DRAINAGE.

The drainage situation is assuming a more serious aspect day by day. How soon are messures to be contrived for the abatement of this mephitic nuisance? How much longer are the people of Carson to be subjected to having their nostrils nightly filled with the nauseating vapors which arise from the overflowing cesspools and deficient drainage? The sultriness of the nights during this Summer have rendered it necessary to keep the windows of bedrooms open during sleeping hours; and while the sleeper lies unconscious, these poisonous vapors steal upon him or her with the seeds of death. The prevailing winds at this season have in a measure had a tendency to carry off the malaria which, without them, would have settled in the houses of our people. However, we cannot always rely upon this assistance. The malaria which nightly overhangs our city will suddenly swoop down upon us with fatal effect, the contemplation of which is enough to make us shudder, carrying away loved ones and causing many long suffering upon sick beds. The lethargy on the part of the authorities in relation to this matter is wonderfully incomprehensible, we may say inex-cusable. The seeds of painful and fatal diseases are being disseminated throughout the city, yet an inactivity which is astounding, if not criminal, prevails. The alarm which we sound is not uncalled for; it is not a cry of wolf without the animal being in sight. The fierce wolf with jaws extended stands at our very threshholds, assuming a fearfully threat-ening attitude. The cost attending the labor of establishing a more perfect sewerage system would certainly not require the expenciture of more than a few thousand dollars, and by these means the health of our city could be secured. If the authorities are not authorized to make this outlay to insure the health of our city, let them make a public statement to that effect. Or why could not a special tax be levied. In any event, if the authorities do not manifest a disposition to do something practically we shall call upon our public spirited citizens, through these columns, stimulating them to action in this direction.

San Francisco capitalists and mining experts arrived from Bodie district last evening, and their reports of that district are the most whole section of the country is a vast gold mine. While there, Messrs. Lent and Boyd Let us not sit still, with folded hands, next to the Standard, the shaft of which is only down 60 feet, for \$50,000 cash. These strive for it. Our resources are great, They cannot express themselves in terms too flattering of all the mines that have up to this time been located. The Bechtel mine is idle men in our midst; why do they not go down 120 feet, and the prospects are perfectly prospecting in the hills which surround our miraculous. The Bulwer mine is down 130 basin while they have nothing else to do? feet and the ore, of which it has great quan- Riches are there, but it requires labor to find tities, assays \$355 per ton, it has as fine rock and develop them. as any mine in the camp. The Red Cloud mine is taking out ore, which is worked in Aurora, and nets \$400 per ton. The Standard mine will ship \$130,000 during the current month. The real wealth of the camp is incalculable-immense. Mr. Lent says that no one who has not been to Bodie can form the remotest conception what a future it has before it. The mines rival anything that has yet been discovered on this coast,

Among the arrivals Sunday evening from Lake Taboe, was the following distinguished party Sir. J. H. Hooker, F. R. S., a renowned botanist from London, Professor Asa Gray, professor of botany at Harvard University and Dr. F. V. Hayden, a celebrated geologist, identified with government surveys in the Northwest, who is principal in the location of the National Park on the Yellow Stone. This party went to Virginia yesterday morning, from whence they re-turned last evening. Hence they go to Hope Valley, Calavares Big Trees and so on to San Francisco, the Mecca of all western tourists. Their visit is one of pleasure and scientific research combined.

Mr. M. Anderson, formerly of the Adams House, returned from a prospecting trip of geveral weeks' duration yesterday. He reports Monitor, Alpine county, in a very flourishing condition; there is considerable prospecting going on there, and the ultimate unearthing of some valuable mines is assured. Silver Mountain is very dull; very little energy is being displayed by the residents of that dreamy little burg. Mr. Anderson believes that if a little more capital and energy were to be thrown into Alpine county the former prosperous times could be revived.

A The Right Rev. Bishop O'Connel Catholic Bishop of this Diocese preached in St. Teresa's church on Sunday last, and administered the sacrament of confirmation. He will remain here for a few days, before returning to his home in Maryaville. The Bishop seem now to be enjoying the best of health. He is held in very high esteem by all who know

WEIT OF SUPERSEDEAS GRANTED .- Chief Justice Hawley yesterday granted a writ of supersedess in the case of Samuel Mills, convicted of murder in the first degree in Elko county. This writ stops all further proceedings of the court below, until the Supreme Court have taken up the case and decided whether or not Mr. Mills is entitled to a new

It is reported that two professional fishermen were on the lake yesterday morning while the late H. B. Bostwick was bathing, and saw him struggling in the water, but did not come to his assistance from fear of being charged with his murder, in the event that they failed to rescue him. This rumor emanates from reliable sources.

STOCKS. - There were no material advance in the prices of securities yesterday from Saturday's quotations. Market is dull and heavy.

Mr. Gould, Supt. of the North Carson mine, says that the Ayers & Hopkins mine, and other mines lying contigious to it, have been inaccessible for want of a good wagon road. This obstacle has now been removed thanks to the public spirit displayed by the officers of the A & H. mine. The building of a road which has been progressing for some time, will be completed next week, and the shipment of ore from this mine will be Measrs. Wm. M. Lent and John F. Boyd, duced from this A. & H. is very rich, and equally as good as any on the Comstock. Before the expiration of a great while, this company will erect its own mill for the crushing of its ores. What further evidence enthusiastic and encouraging of any we have do we require to prove that good mines are heard yet. The mines are good, and that to be found in the immediate vicinity of Carson? Now let a little more enterprise be dispurchased the South Bullion mine, situated Micawber like "waiting for something to gentlemen proceeded to Virginia last evening wonderfully great, and if the energy and to purchase machinery for their new mine. enterprise which lies dormant in the people of Ormsby county can be awakened, great results may be arrived at. There are many

> The police authorities have been making thorough and searching investigation into the causes of the recent numerous fires, and have unalterably decided that their origin can be ascribed to nothing but accident. No evidences of incendiarism have presented themselves. The report that inflammable matter, saturated with coal oil, had been discovered under several buildings in this city, turns out upon inquiry to have been a hoax. It is a matter of congratulation to the people of Carson that no evidences of incendiarism have appeared on the surface of the late conflagrations-accidental fires are bad enough.

The case of James Henry, with numerous aliases, charged with petty larceny, was called in the Police Court yesterday and found guilty. The prisoner was sentenced to imprisonment in the county jail for the period of 50 days and a fine of \$100, with the option of serving out the money penalty at the rate of \$2 per diem.

Mr. William Sexton, special agent of the Fireman's Fund Insurance Co. of San Francisco, was with us again yesterday, adjusting the loss on the property destroyed by fire on the morning of the 10th inst, belonging to Mr. Moody. The money was paid and all is

At a very early hour yesterday morning, at a time when all good people should be clasped in the soothing embraces of Morpheus, two members of the demi-monde were engaged in a war of words in the neighborhood of the Ormsby House. It was all smoke and no
